

## Guide – Estimated Position

You are traveling NE toward Newport RI and have just broken out chart 1210 Tr.

Your route takes you directly to Green Buoy “1B1” which lies just north of Block Island/Sandy Point (SW corner of the chart).

You pass abeam of the “1B1” at 25 yards at 1017 and note that on your chart.

Your next close-aboard waypoint is Buoy W OR “H” which lies 1nm SSW of the Brenton Reef light.

At 1145, using your hand bearing compass, you sight Pt. Judith Light. It bears 287 magnetic.

Tired of the relentless sports conversation in the cockpit, you go below to chart your estimated position.

Approximately how far off the DR plot is your estimate?

Exactly how boring is Barry Bond’s plight?
